THE PRODUCTS

THE COMPANY

Since 1961, Aygaz has been at the forefront of Türkiye's LPG industry, delivering integrated solutions across the entire value chain, from procurement and storage to distribution and the production of LPG equipment.

Backed by a robust supply and logistics network, Aygaz provides high-quality LPG solutions to customers in both domestic and international markets. Through its modern terminals, filling plants, and distribution centers, the company operates in line with the highest international standards while maintaining a strong focus on operational excellence, safety, and reliability.

As one of the companies with the largest LPG storage capacity in Türkiye, Aygaz leverages advanced technologies and comprehensive safety systems throughout its operations. Supported by an extensive nationwide dealer and autogas station network, the company delivers safe and uninterrupted energy solutions to millions of consumers across the country.

Aygaz has been active in maritime transportation through its own fleet since 1967 and today manages one of Türkiye's largest LPG marine logistics operations with four LPG carriers. On land, a fleet of tankers and transport vehicles ensures the safe and efficient delivery of LPG to facilities, dealers, and customers nationwide.

In addition to its energy operations, Aygaz manufactures LPG cylinders and a wide range of industry-related equipment at its advanced production facilities, exporting its products to more than 80 countries worldwide. As part of its international growth strategy, the company continues to strengthen its global presence through United Aygaz LPG, its joint venture in Bangladesh.

With more than 65 years of expertise, a strong infrastructure, and a commitment to innovation, safety, and customer satisfaction, Aygaz continues to be one of Türkiye's most trusted and respected energy companies.

THE PLANT

Aygaz's cylinder manufacturing activities in Türkiye are carried out at its modern production facility located in Toprakkale, Osmaniye. Representing an investment of approximately USD 25 million, the new facility marks a significant step in Aygaz's manufacturing journey and strengthens its production capabilities in a strategically important location.

Located in southern Türkiye, the Toprakkale, Osmaniye facility is strategically positioned with access to key international markets across the Middle East, Africa and Europe. Its location, approximately 60 km from İskenderun Port and 160 km from Mersin Port, provides strong connectivity to major maritime trade routes and supports Aygaz's international operations.

With a manufacturing area of 53,000 m², the facility is the largest LPG cylinder manufacturing plant of its kind in Türkiye. Worldwide, Aygaz is recognized as one of the leading manufacturers of steel LPG cylinders.

Designed with advanced manufacturing technologies and a strong focus on efficiency, quality and occupational safety, the facility produces high-quality steel LPG cylinders that meet international standards as well as customer-specific requirements.

With an annual production capacity exceeding 4 million LPG cylinders, the Toprakkale, Osmaniye facility serves customers across multiple international markets and stands among the leading LPG cylinder manufacturing plants in the region.

STEEL LPG CYLINDERS

Combining decades of LPG expertise with modern manufacturing technologies, Aygaz produces high-quality steel LPG cylinders designed for safety, durability and long service life.

To date, Aygaz has produced more than 80 million LPG cylinders, in capacities ranging from 4.95 L to 120 L, and developed over 700 product types. With more than 65 years of manufacturing experience, Aygaz currently supplies LPG cylinders to customers in over 80 countries across four continents.

OTHER CERTIFICATIONS AND AUTHORIZATIONS

EN ISO 3834-2 (TÜV AUSTRIA)
Certified Welding Quality Requirements for
Fusion Welding of Metallic Materials

TSE Compliance Certification
Cylinders manufactured in compliance with Turkish Standards and
subject to regular TSE surveillance

ADR In-House Inspection Service Authorization (Türk Loydu)
Authorized for in-house production and periodic inspection of
cylinders in accordance with ADR requirements

TPED & ADR In-House Inspection Service Authorization (TÜV SÜD)
Authorized for in-house conformity assessment and inspection of
Pi-marked cylinders under TPED and ADR requirements

DOT Approved Manufacturer
Approved manufacturer for LPG cylinders supplied
to the United States market

CESMEC Approved Manufacturer
Factory and products approved for the Chilean market,
subject to regular CESMEC inspections

At the Toprakkale, Osmaniye facility, which holds a wide range of certifications, production is supported by high levels of automation, robotic technologies and flexible manufacturing capabilities. This approach enables Aygaz to meet a wide range of customer specifications while delivering quality-engineered products with competitive lead times and consistent reliability.

Supported by advanced manufacturing technologies, Aygaz cylinders are produced through highly automated processes, including robotic welding, controlled heat treatment, automated testing and comprehensive quality control systems. This integrated production approach ensures consistent product quality, full traceability and compliance with international standards.

Designed to meet the requirements of residential, commercial and industrial applications, Aygaz LPG cylinders offer a reliable and cost-effective solution for LPG distribution companies seeking long-term performance, safety and operational efficiency.

Aygaz also manufactures a range of industrial steel cylinders for specialized applications, including cylinders designed for operation in ambient temperatures as low as -40°C .

SUPPLY CHAIN

Aygaz operates one of the most extensive LPG supply chains in the region, supported by a diversified sourcing network, advanced logistics capabilities, and strong infrastructure.

Through a broad supplier portfolio and integrated operations, the company ensures supply security while maintaining its position as a leading player in the international LPG market.

Maritime logistics is a key component of Aygaz's supply chain. Through its subsidiary Anadoluhisarı Tankercilik, the company operates a fleet of four specialized LPG carriers: Kandilli, Kuzguncuk, Beykoz, and Beylerbeyi. This fleet supports international sourcing and transportation activities while strengthening operational flexibility and supply continuity. To further expand its maritime capabilities, Aygaz has also invested in a new Very Large Gas Carrier (VLGC) scheduled for delivery in 2028.

Complementing its maritime operations, Aygaz operates Türkiye's largest road LPG transportation fleet, ensuring reliable nationwide distribution through an integrated logistics network. Supported by advanced digital planning and optimization systems, Aygaz manages its supply chain with a focus on safety, efficiency, sustainability, and uninterrupted service.
